Disease of money, but reflection's cure.

V Mo. M A Y, hath 31 Days. 1794.

We owe, great DRAM, the trembling hand to thee,  
 The headstrong purpose, and the feeble knee;  
 The loss of honour; and the cause of wrong;  
 The brain enchanted, and the fault'ring tongue:  
 Whilst Fancy flies before thee unconfin'd,  
 Thou leav'st disabled Prudence far behind.

VI Mo. J U N E, hath 30 Days. 1794.

In thy pursuit our fields are left forlorn,  
Whilst giant weeds oppress the pigmy corn.  
Thou throw'st a mist before the Planter's eyes;  
The plough grows idle, and the harvest dies.

By thee refresh'd, no cruel Norths we fear;  
'Tis ever warm and calm, when thou art near:

VII Mo. JULY, hath 31 Days, 1794.

On the bare earth for thee expos'd we lie,  
And brave the malice of a frowning sky.  
Like those who did in ancient times repent,  
We sit in ashes, and our cloaths are rent.

From thee a thousand flatt'ring whims escape,  
Like hasty births, that ne'er have perfect shape.

First Quarter 5 Day, 3 h. Morning.

Full Moon 12 Day, 5 h. Afternoon.

Last Quarter 19 Day, 11 h. Morning.

New Moon 26 Day, 5 h. Afternoon.

VIII Mo. AUGUST, hath 31 Days. 1794.

Tame idiots seem in gay delusion fair;  
Both born in flame, they soon expire in air.  
O grand deluder! such thy charming art,  
'Twere good we ne'er should meet, or ne'er should part:  
Ever abscond, or ever tend our call;  
Leave us our sense entire, or none at all.

Full Moon 11 Day, 2 h. Morning.

And dreadful end the CLOSING YEAR.

#### SATYRICAL ANECDOTE.

IN the reign of Charles II. of witty memory, a man of obscure birth and education had the good fortune to do that monarch an important piece of service; for which his friends importuned the King to make him a Gentleman: to which he satirically replied, "that that was altogether out of his power, but he was willing to make him a Lord, if they thought proper."

The works of the great Lord Bacon contain the following rules respecting the weather—which may be useful, if attended to in the season for making hay.

1st. If the new moon does not appear till the fourth day, it prognosticates a troubled air for the whole month.

2d. If the moon, either at her first appearance or within a few days after, has her lower horn obscured or dusky, or any way dimmed, it denotes foul weather before the full; but if she be discoloured in the middle, storms are to be expected about the full; or about the wane, if her upper horn is affected in like manner.

3d. When the moon, on her fourth day, appears pure and spotless, her horns unblunted, and neither flat nor quite erect, but betwixt both, it promises fair weather for the greatest part of the month.

4th. An erect moon is generally threatening and unfavourable, but particularly denotes wind; though if she appears with short and blunted horns, rain is rather to be expected.

The above observations have been attended to for many years, and were never known to fail.

“Behold the labourer of the glebe, who toils,  
In dust, in rain, in cold and sultry skies;  
Save but his grain from mildews and the flood,  
Nought anxious he what sickly stars ascend.”

*An easy and expeditious Method of finding the INTEREST of any sum of Money, for any number of days, at the rate of six per cent. per annum.*

MULTIPLY the sum in pounds by 1-3d part of the number of days, and cut off two figures to the right, which are half farthings; the rest of the figures are shillings; then for every pound in this sum, deduct 3d.  $\frac{1}{2}$ , and you have the interest. Note, this rule supposes the year to consist of 365 days and six hours, and is consequently truer than any table of interest yet published; and, on account of its expedition, should be preferred to any rules or tables we know of.

---

*A sure Method of becoming rich.*

LET every man keep a fair account of all the debts he contracts, and all the money he spends, through the year; and let him see to it that he earns at least thirteen pence for every shilling he spends, and he will not fail to become independent.

## C O N T E N T.

THE foundation of content must spring up in a man's own mind; and he who has so little knowledge of human nature as to seek happiness by changing any thing but his own disposition, will waste his life in fruitless efforts, and multiply the griefs which he purposed to remove.

## S O L I T U D E.

IN solitude, if we escape the example of bad men, we likewise want the counsel and conversation of the good.

The life of a solitary man will be certainly miserable, but not certainly devout.

To those who pass their time in solitude and retirement, it has been justly objected, that if they are happy, they are happy only by being useless; that mankind is one vast republic, where every individual receives benefits from the labour of others, which, by labouring in his turn for others, he is obliged to repay; and that where the united efforts of all are not able to exempt all from misery, none have a right to withdraw from their task of vigilance, or be indulged in idle wisdom, and solitary pleasures.

## A M A N O F PLEASURE.

A MAN of pleasure is a child of folly, an unbridled animal, a court-savage, the dupe of fancy, slave of vice, and foe of reason; he is the fork of dissipation, the crutch of avarice, and bane of innocence. Softened to effeminacy on the lap of maternal indulgence, and flushed with the polish of superficial embellishments, he shudders at the rigid discipline of virtue, and shrinks at the thought of ascending the hill of manly science, though for the repast of angels. He treads upon ice, tramples upon property, deifies the brute, and dances blindfold upon a precipice. His breath is contagious, his friendship a snare, self his center, and his creed annihilation.

## *The Counsel of Feridoun to his Children.*

FERIDOUN, king of Persia, so celebrated for his wisdom, said to his children, "The life of man resembles a book—and the days which compose it, the leaves. Be careful to write nothing in it, but such actions as deserve praise, and may contribute to the happiness of the people which you are destined to rule."
